Subscribed

peak) and **Developed** Markets (+6; *+19 peak)*, but **Asia** remains a key focus for investors

- Exposure to **Korea** (+68) remains high and stable but investors are reducing exposure to **China** (+39). They both remain risk on
- DM have been risk on because of high exposure to **Japan** (+49) but this is waning too
- Exposure to the **US** (-6), **Eurozone** (-6) and **UK** (-5) is broadly neutral but heading lower
- Within EZ, exposure to **France** (-43) continues to fall from already risk off positions; **Germany** (+8) and **Italy** (+12) have been trimmed but are still slightly risk on

Investors' Exposure to Major Risk Asset Markets
